SC1500

The enz® surface cleaners impress with their high efficiency and outstanding cleaning performance. Thanks to the new sapphire inserts, the SC1500 achieves multiple times the performance of conventional flat jet or round jet nozzles when cleaning surfaces. The maintenance-friendly design ensures a long service life, a constant rotation speed, and powerful, uniform water jets at a maximum operating pressure of 1,500 bar (22,000 psi).

Applications

- Renovation, preparation, and cleaning of flat and demanding surfaces
- Removal or roughening of old paint and concrete
- Cleaning of tanks, façades, stairways, walls, steel structures, traffic signs, and other surfaces
