SINGLE

700 BAR

LIGHT ON WEIGHT HEAVY ON PROTECTION

You asked for lighter protective clothing without compromising on protection. As always, we listened. Introducing **UltraOperator®** – an entirely new range of lightweight, comfortable PPE offering protection up to **2000 bar / 30000 psi**.

The new series is made possible by our core design philosophy, Athletic Design, combined with the development of a new, softer protective material incorporating the exceptionally strong Dyneema® fiber.

The protective layer itself is more flexible, yet a single layer is sufficient to achieve the required level of protection. The result is PPE that is very lightweight and comfortable to work in.

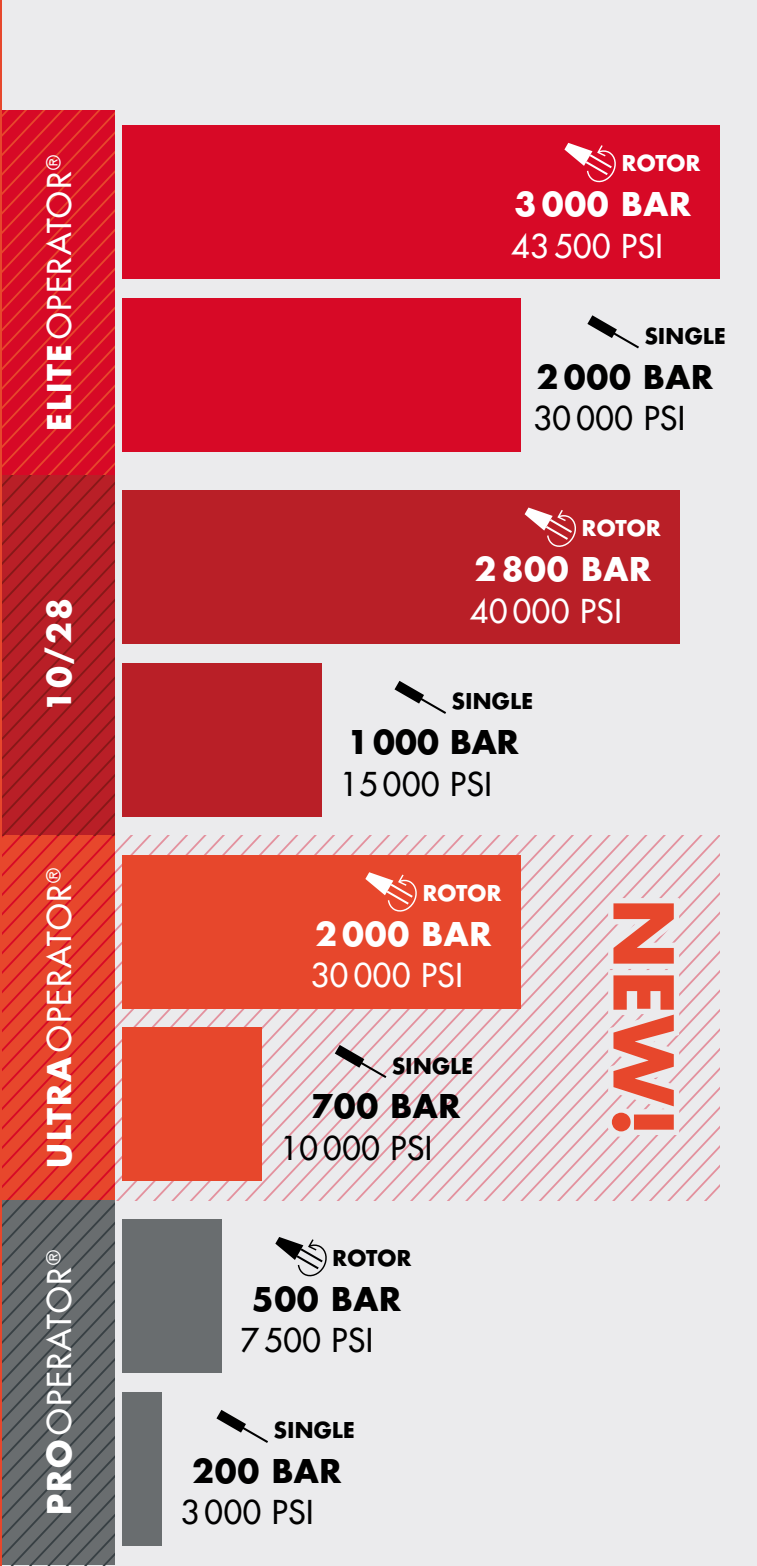

LIGHTWEIGHT

SOFT & FLEXIBLE

A NEW LEVEL OF WATER JET PROTECTION

THE FABRICS

PROTECTIVE FABRIC

- Soft and lightweight
- A single layer is sufficient
- Made with Dyneema® fiber

OUTER SHELL

- Polyamide
- 500 000 Martindale
- Hydrostatic head > 10 000 mm
